**REPORT ON “HEALTH HYGIENE”**

To bring an awareness in the society we, the department of Information Technology, G.S. Moze College of Engineering, Balewadi, Pune in collaboration with Redcross planned to visit a Government school in Mahalunge village, Pune to aware & provide them the knowledge about Health Hygiene to the rural children who are unaware or neglect the hygiene on 19/02/2022 as a part of Social Activity.

The main motive of the event was to provide knowledge about Health Hygiene as the schools has just reopened after the Pandemic situation to the rural students who normally don't worry about cleanliness. The students & faculties of IT actively participated in the event by explaining them the good habits to be followed & bad habits that have to be removed from their daily activities like washing hands before meals, using Sanitizer, using hand-kerchiefs while sneezing etc. We also gave them the various guidelines to be followed like wearing masks, maintaining Social Distance etc. The students gave a very good response to us by answering various questions. Some of them cleared their doubts by asking various queries. The children were happy & expressed their gratitude to us & the responses received were positive.

We are grateful to the Management and Principal, Dr. Ratnaraja Kumar Jambi for giving us an opportunity to bring a social awareness in the rural children. We are thankful to all the faculties & students of the IT department without whom this event wouldn't have been a grand success.

## Importance of Nutrition for women's health

A webinar on “Importance of Nutrition for women's health” was organized by Civil Department of Genba Sopanrao Moze College Of Engineering College on 28/05/22 at 11:00 am on the occasion of World Nutrition Day. Dr. Leena Chaudhary, Assistant Professor for Yoga therapy, Kavayitri Bahinabai Chaudhari North, Maharashtra University Jalgaon addressed the students on the occasion.

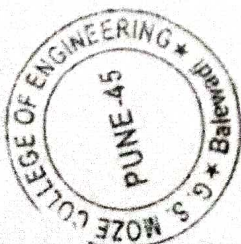

While sensitizing on the facts about nutrition, Dr Leena Chaudhary pointed out the improper food habits prevailing among young women. She also explained that this condition not only spoils the physical health but also the psychological wellbeing.

Proper nutrition is essential for women as maternal nutrition can have a direct impact on the health, growth and development of the next generation. Both men and women have nutritional needs such as protein (meat, fish, dairy products, seeds and nuts), carbohydrates (whole grains), healthy fats (healthy oils), vitamins, minerals, and water. Dietary factors are directly linked to the leading causes of death among women, such as coronary heart problem, certain types of cancer, stroke, and type 2 diabetes mellitus, etc.

These days, women are giving their best to fill the nutritional requirements of their families and children with healthy foods. However, it usually gets difficult to manage our own self along with the busy schedule and so many responsibilities of home and work. Everyone should know that for women also nutrient-rich food is essential. It is seen the most women these days experience problems such as hair fall, hormonal imbalance, body pain, depression and mood swings. These symptoms of PCOD can also be due to the deficiency of nutrients in a woman's body. Along with that, due to an imbalance of nutrients, signs such as fatigue, wrinkles on the face at a young age, less glow and dullness can also be seen in women. Specific nutritional deficiencies such as iron, vitamin D and vitamin B12 are more commonly seen in women

At the end of the session, the resource person focused on the need to consume organic foods especially fruits and vegetables. She encouraged the students to strictly maintain the frequency of food intake patterns and to change their lifestyles by involving in various physical activities. Outcome:
