## Principal Message

The knowledge component enables one to understand what one learns in relation to what one already knows and provides the continuity in education. While know-how is the ability to translate knowledge into action.

The knowledge component has an invariant core that consists of fundamentals based on universal laws and an outer layer of constantly improving and rapidly expanding empirical knowledge of particular systems, constantly changing applications of increasing sophistication and complexity and constantly improving tools. Education is a combine responsibility of academia, industries, professional associations and society.
